

Branch

Flawless design. Precision engineering. Handmade, one by one.

DETROIT IS OUR GEOGRAPHY. WE GREW UP HERE, ALWAYS RESPECTING
THE GRITTY GENIUS OF THIS PLACE WE CALL HOME.

Great design and manufacturing are in our history. A big love for the landscape is our passion. What can you expect from planter boxes, fountains, pergolas and custom-made garden ornament from Branch? First and foremost—all steel. Great proportions, presence and style. Custom design and sizing as you need it. A rugged finish renowned for its distinctively beautiful patina, and appreciated for its maintenance-free durability. Every piece we manufacture is precisely cut from heavy gauge steel, welded, galvanized and finished with a lifetime of beauty and service in mind.

If you have a landscape project that needs something special, we can help you get there.

The Details

HISTORY

Deborah Silver is a landscape and garden designer who founded Deborah Silver and Company, Inc. in 1986. She opened Detroit Garden Works, a retail store devoted to fine and unusual garden ornament and specialty plants, in 1996. In 2003, she established The Branch Studio, which designs and manufactures garden ornament. Her three companies provide a wide range of choice products and services to discriminating gardeners and designers alike.

PRODUCTS

Branch fabricates 3 styles of planter boxes, available in 4 stock sizes. Each box is made from heavy gauge cold rolled steel, which is laser cut, and tig welded. A pair of steel plates sit on an angle iron ledge in the bottom of our boxes. This loose design insures good drainage. The tapered pots are a round variation on our Hudson box, and are available in 3 sizes. Our signature patinated finish is the closest to rust proof, weather proof, and maintenance free of any finish we have ever seen on steel garden ornament. Custom sized planters and boxes are available as well. Contact us for information.

DESIGN SERVICES

We provide design services for custom boxes, pots, fountains, pergolas, arbors, sculpture and the like. If you can dream it, we can probably build it.

THE FINISH

Our finish is variable when new. Once our garden ornament has had a chance to weather outdoors, the finish is a fairly uniform, chalky, and faintly bluish gray. The finish is very close to the color of old oxidized lead—very desirable.

FOUNTAINS

Our fountains come plumbed with a central jet, standard. We can recommend a pump size, based on the amount of action desired from the jet. Custom jet sizes and configurations are available on request. Most fountains can be fabricated with leg height to your specification, depending on the installation.

FOUNTAIN CLEANING & CARE

Chlorine and algaecides can severely damage the finish and plumbing in our fountains. We recommend cleaning them with water and a sponge.

DESIGN RESOURCES

Our on-staff architect is available for consultation, to you or your contractor. We can design and provide CAD drawings as needed—email us for a quote.

SHIPPING

We ship anywhere in the U.S. and Canada. Contact us for a quote.

TERMS/WARRANTY

A copy of our general terms of sale and our warranty is available on request.
